## No. 1, January

Efficient Mitigation of Edge Effects in Nearest-Neighbor Analysis—J. D. FROST AND D. R. SAUSSUS 3

Experimental and Numerical Study of Delamination Growth Induced by a Transverse Crack in Unidirectional Laminates Subjected to Bending Loads—F. JAVIDRAD 12

Displacement Ductility of the Steel Members under Axial Tension—A. M. ITANI AND J. WOODGATE 22

Measurement of Young's Moduli for Lead Zirconate Titanate (PZT) Ceramics—T. FETT AND D. MUNZ 27

Statistical Properties of Bukit Timah Granite in Singapore—C. WU, H. HAO, AND Y. ZHOU 36

Leaching Studies on ASTM Type F Fly Ashes by an Accelerated Process Method—N. S. PANDIAN AND S. BALASUBRAMONIAN 44

*Technical Note:* Stochastic Resonance in Acoustic Emission—M. FRIESEL 52

*Technical Note:* Reexamination of ASTM C 1202—Standard Test Method for Electrical Indication of Concrete's Ability to Resist Chloride Ion Penetration—R. C. JOSHI, S. CHATTERJI, G. ACHARI, AND P. MACKIE 59

*Technical Note:* A Proposal for Specimen Size Requirements in Toughness Qualification with the Welbull Stress Criterion—T. MIYATA, T. TAGAWA, AND H. YANG 62

## No. 2, March

Precision of ASTM D 5821 Standard Test Method for Determining the Percentage of Fractured Particles in Coarse Aggregate—A. J. HAND, J. A. EPPS, AND P. E. SEBAALY 67

Comparison and Evaluation of Tests for Coarse Aggregate Particle Shape, Angularity, and Surface Texture—M. S. HOSSAIN, F. PARKER, AND P. S. KANDHAL 77

Ultrasonic Monitoring of a Low-Temperature Diffusion Bonding Process—Y. GREENBERG, D. ITZHAK, G. KOHN 88

The Effect of Load and Crack Misalignment on Stress Intensity Factors for Bend-Type Fracture Toughness Specimens—F. I. BARATTA AND T. FETT 96

Product/Package Interaction: Effect of Physical, Chemical, and Climatic Environments—M. D. NEWSHAM, J. R. GIACIN, AND S. P. SINGH 103

The *U* Test for Outlier Detection in Normal Distributions with Known $\sigma$—W. WANG AND T. WANG 109

Measurement of Anchor Strength in Non-Rigid Substrates—T. FARQUHAR, M. D. CONYERS, AND J. T. DIXON 112

Extension and Evaluation of Fatigue Model for Product Shock Fragility Used in Package Design—G. BURGESS 116

Identifying Segregation in Hot Mix Asphalt Pavements Using Rolling Nuclear Gage Measurements and Infrared Imaging—M. STROUP-GARDINER 121

Remedial Sealant Procedures for Fixed Glass and Curtain Walls—P. E. BEERS AND K. F. YAROSH 131

*Technical Note:* Modification of ASTM F 1671-97a, Resistance of Materials to Penetration by Blood-Borne Pathogens, for Use with Elastomeric Materials—R. W. KISIELEWSKI, L. B. ROUTSON, M. P. CHAPUT, AND C. D. LYTLE 136

## No. 3, May

Letter from the Editor 141

© 2000 by the American Society for Testing and Materials

An Improved Capping Technique for Excavatable Controlled Low Strength Material Compressive Strength Cylinders—H. J. SAUTER AND L. K. CROUCH 143

Porosity and Wear Resistance in Stone Flooring Tiles—I. D. MACGREGOR AND K. Y. CHIU 149

Injuries Due to Traditional and Soft-Core Centered Baseball Impacts: A Review—R. D. BEAUMONT 155

Falling-Weight Deflectometer Sensor Location in the Backcalculation of Concrete Pavement Moduli—S. LI AND T. D. WHITE 166

Dynamic Shear Modulus and Damping in Iron-Copper and Steel-Based Metal Matrix Composites—A. WOLFENDEN AND J. Q. HODGE 176

Evaluation of the Autofrettage Effect on Fatigue Lives of Steel Blocks with Crossbores Using a Statistical and a Strain-Based Method—E. A. BADR, J. R. SOREM, JR., AND S. M. TIPTON 181

A New Assessment Method for the Bulk Modulus and the Poisson's Ratio of Porous Ceramics—O. YEHESKEL AND O. TEVET 189

Network-Level Pavement Deflection Testing and Structural Evaluation—M. HOSSAIN, T. CHOWDHURY, S. CHITRAPU, AND A. J. GISI 199

Laboratory Measurements and Analysis of Clogging Mechanism of Porous Asphalt Mixes—S. A. TAN, T. F. FWA, AND V. Y. K. GUWE 207

Characterization of Mechanical Properties in Surface-Treated Materials—A. C. BATISTA AND A. M. DIAS 217

*Technical Note:* A New Technique for Measurement of the Strength of Ceramic Shells in the Precision Casting Process—A. CHENNAKESAVA REDDY, V. S. R. MURTI, AND P. M. JEBARAJ 224

## No. 4, July

A Novel Instrument for Automated Principal Strain Separation in Reflection Photoelasticity—M. N. PACEY, S. J. HAAKE, AND E. A. PATTERSON 229

In Situ Measurement of Fatigue Crack Growth Rates in a Silicon Carbide Ceramic at Elevated Temperatures Using a DC Potential System—D. CHEN, C. J. GILBERT, AND R. O. RITCHIE 236

Loss of Compression Strength in Corrugated Shipping Containers Shipped in the Single Parcel Environment—S. P. SINGH AND S. PRATHEEPTHINTHONG 242

Development of Small Punch Tests for Creep Property Measurement of Tungsten-Alloyed 9%Cr Ferritic Steels—S. KOMAZAI, T. HASHIDA, T. SHOJI, AND K. SUZUKI 249

Low-Cycle Fatigue Characteristics of Precipitation-Hardened Superalloys at Cryogenic Temperatures—N. SUZUKI 257

Development of a Machine for Closely Controlled Rolling Contact Fatigue and Wear Testing—D. I. FLETCHER AND J. H. BEYNON 267

The Influence of Specimen Size on the Fracture Behavior of a Structural Steel at Different Temperatures—L. TOSAL MARTINEZ, G. RODRIGUEZ GONZÁLES, F. J. BELZUNCE VARELA, AND C. BETEGÓN BIEMPICA 276

Experimental Study of Residual Stress Distributions in Quenched Parts by the Incremental Large Hold Drilling Method and by the Neutron Diffraction Method—S. R. YAZDI, D. RETRAINT, AND J. LU 282

Exterior Insulation and Finish Systems (EIFS) Use in Wood-Framed Residential Construction: Design Concepts to Avoid Common Moisture Instrusion Problems—M. B. BRONSKI AND S. S. RUGGIERO 290

DC Potential Drop Calibration in Creep-Fatigue Loading Conditions—N. MERAH 301

*Testing Forum:* Diagnostic Scores for Interlaboratory Study Data—C. H. PROCTOR 307

## No. 5, September

Cyclic Loading and Creep of Intracranial Aneurysm Clips—T. O. WOODS 337

Measurement of Apparent Thermal Conductivity by the Thermal Probe Method—K. MANOHAR, D. W. YARBROUGH, AND J. R. BOOTH 345

Development of a Multiple Linear Regression Model to Estimate the Ductile-Brittle Transition Temperature of Ferritic Low-Alloy Steels Based on the Relationship Between Small Punch and Charpy V-Notch Tests—M. L. SAUCEDO-MUÑOZ, T. MATSUSHITA, T. HASHIDA, T. SHOJI, AND H. TAKAHASHI 352

Fatigue and Stress Analysis of a Novel Test Coupon Geometry Developed for Hydraulic Pressure Impulse Testing—T. P. SAVAS AND J. C. EARTHMAN 359

Estimation of Particle Size Distribution in Materials in the Case of Spheroidal Particles Using Quantitative Microscopy—A. HASHIMOTO, T. MIYAZAKI, H.-G. KANG, H. NOGUCHI, AND K. OGI 367

Repeatability Analysis of Road Roughness Measurements—M. DIVINSKY 378

Testing of Thermal Imagers for Nondestructive Thermal Testing Applications—K. CHRZANOWSKI, J. FISCHER, B. GUTSCHWAGER, AND W. WRONA 395

Leaching Behavior of Indian Fly Ashes by an Oedometer Method—N. S. PANDIAN AND S. BALASUBRAMONIAN 403

*Technical Note:* An On-Line Correction Technique of Random Loading with a Real Time Signal Processor for a Laboratory Fatigue Test— M. LI, Y.-S. WU, B.-H. XU, W. JIA, AND W. ZHAO 409

*Technical Note:* Transverse Vibration of a Simply Supported Frustum of a Right Circular Cone—J. F. MURPHY 415

*Technical Note:* Evaluation of the Gavarti Associates—Comprehensive Abrasion Tester—G. BURGESS, P. SINGH, AND E. KNUDSEN 420

## No. 6, November

Effect of Zeolitization on Compaction, Consolidation, and Permeation Characteristics of a Lagoon Ash—P. K. KOLAY AND D. N. SINGH 425

Finite Element Analysis and Small Punch Testing for Determining the Cryogenic Fracture Toughness of Austenitic Stainless Steel Welds—Y. SHINDO, K. HORIGUCHI, T. SUGO, AND Y. MANO 431

Experiment Evaluation of the Dynamic Shear Strength of Adhesive-Bonded Lap Joints—V. SRIVASTAVA, A. SHUKLA, AND V. PARAMESWARAN 438

Angle of Internal Friction for Pond Ashes—N. S. PANDIAN, A. SRIDHARAN, AND S. SRINIVAS 443

Liquid Limit Determination of Class F Coal Ash—A. SRIDHARAN, N. S. PANDIAN, P. S. PRASAD 455

Effects of Fixturing Mass on Dynamic Strain Errors in Structural Fatigue Testing—R. L. HEWITT 462

Evaluation of Density Gradients in Loaded Wheel Tester Samples—L. A. COOLEY, JR. AND P. S. KANDHAL 473

Assessment of Misalignments in Some Selected Buildings in Jordan and Their Structural Effects—M. A. H. ABDEL-HALIM AND M. T. OBAIDAT 485

A Comparison of Two Methods for Measuring Light Scattered from Aerospace Transparencies—P. L. MARASCO 494

Optimum Lime Content for Fly Ashes and the Role of the Curing Period—P. V. SIVAPULLAIAH, J. P. PRASHANTH, AND A. SRIDHARAN 499

*Technical Note:* Condition Monitoring of a Water Hydraulic Cylinder by Vibration Analysis—A. C. H. TAN, P. S. K. CHUA, AND G. H. LIM 507

*Technical Note:* Fault Diagnosis Theory: Method and Application Based on Multisensor Data Fusion—H. F. WANG AND J. P. WANG 513

*Technical Note:* Consolidation Behavior of Bentonite in Electrolyte Solutions—P. V. SIVAPULLAIAH AND S. SAVITHA 519

*Technical Note:* Method-Specific Precision and Bias Relationships Developed from Data Submitted During USEPA Wastewater Laboratory Performance Evaluation Studies—P. W. BRITTON 526
